

HIMAHEALTH™

QUALITY · AFFORDABILITY · CONVENIENCE · ETHICS

WELCOME TO HIMAHEALTH™

AFFORDABLE QUALITY HEALTHCARE CLOSE TO HOME

HIMAHEALTH, a leading American medical service provider, proudly offers the most modern diagnostic, surgical and treatment methodologies and equipment, earning our hospitals Joint Commission accreditation. You'll find physicians and technology on par with the best hospitals on the U.S. mainland – or anywhere else in the world.

HIMAHEALTH QUALITY It's the calling card of our physicians and practitioners recruited from top universities and hospitals throughout the U.S., Puerto Rico and the world. As a fully accredited health service, our physicians and procedures focus on maximizing benefits to the patient while minimizing procedural risk and discomfort.

HIMAHEALTH AFFORDABILITY We can offer U.S.-quality healthcare treatments in Puerto Rico at savings of 50–70%. And to ensure that our quality and professionalism are on par with the best hospitals on the U.S. mainland, our equipment, facilities and professionals must meet the same standards for Joint Commission accreditation.

HIMAHEALTH CONVENIENCE With Puerto Rico being a commonwealth of the United States, there are no passport requirements when traveling from the U.S. mainland; currency is the U.S. dollar; medical practices/certifications are the same and Spanish and English are the official languages.

HIMAHEALTH ETHICS HIMAHEALTH facilities in Puerto Rico abide by stringent ethical principles in all aspects of patient care, medical education, clinical research, community service and in all administrative roles related to those services.

CENTERS OF EXCELLENCE

HIMAHEALTH offers modern hospital facilities with a full spectrum of care including four specialty "centers of excellence" as well as a diverse range of other surgical areas. Each delivers advanced treatments found in only the finest, select hospitals.

NEUROLOGICAL CENTER Our board-certified physician specialists bring expertise in pediatrics, neuromuscular conditions and oncology. The center also offers treatment in areas such as stroke management, epilepsy surveillance and stereotactic robotic radiosurgery for brain and spine conditions.

CARDIOVASCULAR INSTITUTE One of the most advanced and comprehensive cardio units in the U.S., our Cardiovascular Center has cardiologists, interventional cardiologists, invasive radiologists and cardio thoracic surgeons who bring years of leading-edge experience from the finest universities and hospitals in the world.

ORTHOPAEDICS CENTER Whether you are looking for an orthopaedic repair from a previous injury or a total joint replacement, our U.S. board-certified surgeons have trained in specialties such as traumatic orthopaedics, joint replacement, arthroscopy and the full gamut of spinal procedures including minimally invasive disc repair, total spine rebuilding or surgical scoliosis correction.

ONCOLOGY CENTER Using advanced 4D diagnostic imaging equipment to identify and map tumors with pinpoint accuracy, physicians in our HIMAHEALTH Cancer Center are performing breakthrough surgeries, leading to better outcomes and less recovery time.
